Don't pay for power bills for 6 months! With No Upfront or Ongoing Costs...Ever

In the current crisis, we know businesses are under immense pressure to rapidly reduce their overheads if they wish to survive. SunPlan is supporting small businesses with a stimulus package in which they can power their business, for free, for an entire 6-months.

With SunPlan's small business stimulus package, you have the choice to power your business by locking in a reduced electricity rate of up to 40% over the next 7 years. After the term, you or your landlord will be handed ownership of the entire solar PV system, no strings attached.

Protect your business' future sustainability by having the freedom to generate power as you need it through the use of top of the range solar PV systems. By locking in a fixed rate for 7 years, you not only save money but also lock in your power expenses with no price increase, ever.

Have peace of mind knowing that for the next 7 years, your peak kWh costs will be fixed around 40% lower than today's market rates. No surprises, no hidden fees, no upfront costs.

Sound too good to be true?

SunPlan have worked hard to source funding to allow for over \$100m in PV Solar Systems to be installed on Australian Business' rooftops, for no fee... ever! We've developed this as a solution to help small businesses reduce their overheads, by supporting a more resourceful way to power their business. Not only that, businesses can take back power from the major energy retailers and avoid fluctuating electricity prices in the future by locking in a low, fixed energy rate.

With uncertainties in today's global environment, one thing we know for sure is that those bills will continue to fly through your door, even if the rest of the world is in lockdown.

What is SunPlan?

SunPlan is an energy solution for Aussie businesses, that locks-in your peak energy rate for 7 years, giving you complete control of your energy prices. SunPlan is the first of its kind in the market and this stimulus package was designed to give businesses the freedom to operate with solar power, without the upfront costs.

Businesses who qualify for SunPlan, are those who typically spend more than \$1000 a month on their energy bills however, if you want to know if you qualify, then get in touch.

How it Works

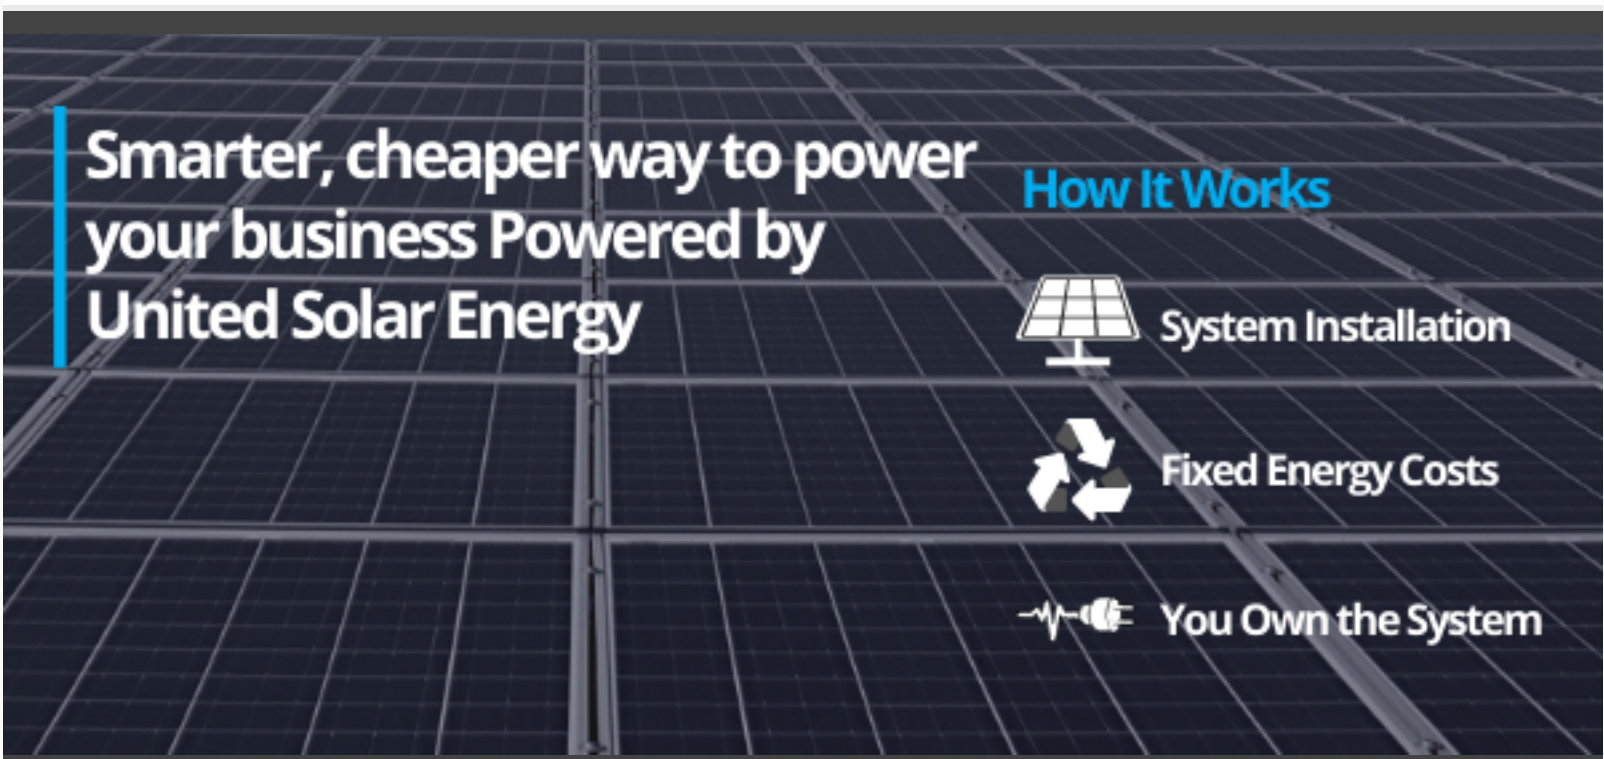

Unlike traditional grid power, SunPlan provides electricity from the sun by using solar panels to power your business. United Solar Energy will install the solar panels designed around your daytime power usage and instead of us selling all the power to your power company, we cut them out and sell it directly to you at a LOW FIXED RATE.

- **Low electricity rates**
You will buy the solar electricity, that the solar panels produce and reduce your electricity costs by up to 40%
- **Fix rate for a term**
We will lock in a fixed rate over a term of 7-years with NO price increase during this term GUARANTEED.
- **Bonus - You will own the asset**
At the end of the term, you will have complete ownership of the solar asset outright with nothing more to pay... Zero.. Zippo..

Benefits of SunPlan through United Solar Energy

- Dramatically reduce your electricity
- Rest assured with low fixed rate cost for the next 7 years
- Power your business through clean, renewable energy
- Potential to increase your property's future value with solar energy
- Avoid uncertainty in the future by powering your own business
- Corporate social & environmental responsibility
